Fixing an H5P Link in a PBLA eUnit

Instructors can relink to appropriate **H5P** activities using **H5P repository** in the **File Picker**. Read the short scenario below and the following steps to remove and relink to another **H5P**.

Situation

1. An instructor clicks on an **H5P activity link** on their course.

2. However, the wrong **H5P activity** appears.

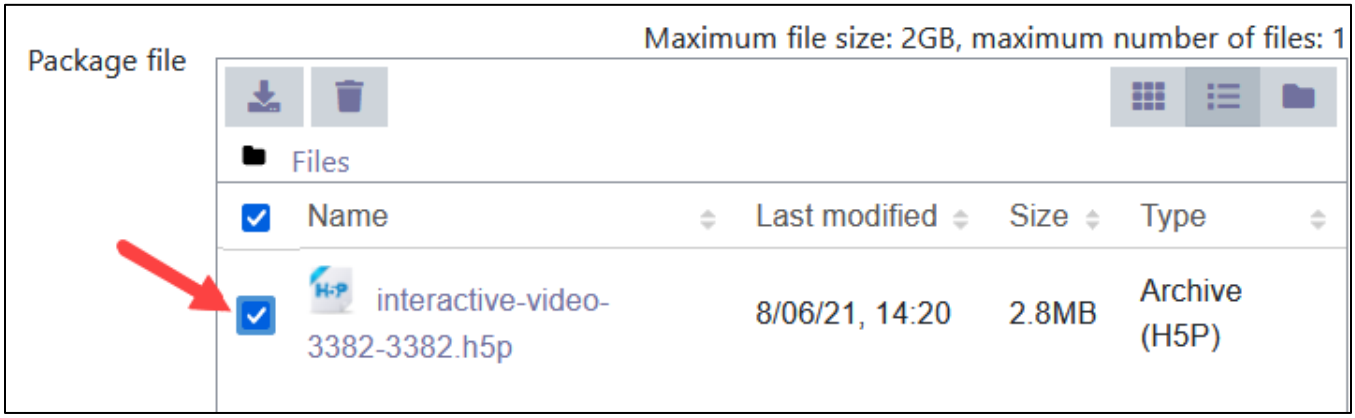
3. Follow the steps in the next section to link to the appropriate **H5P** activity.

Linking an H5P Activity

1. Click on the **H5P** link on the main course page.

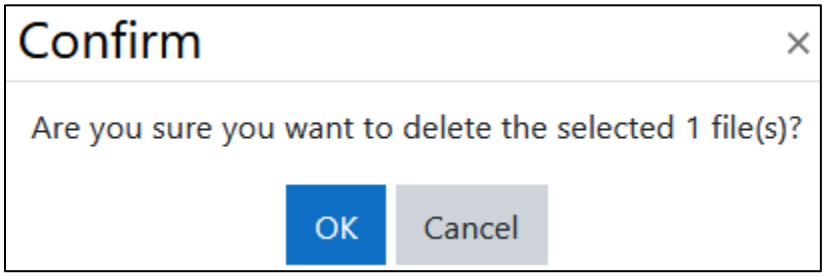
2. With the H5P open, click on the **Actions menu** in the top right corner.

3. Click on the **Edit settings** option.
4. In the **Package file** section, check the **H5P** file to be removed from the list.



5. Click on the **Delete** icon.

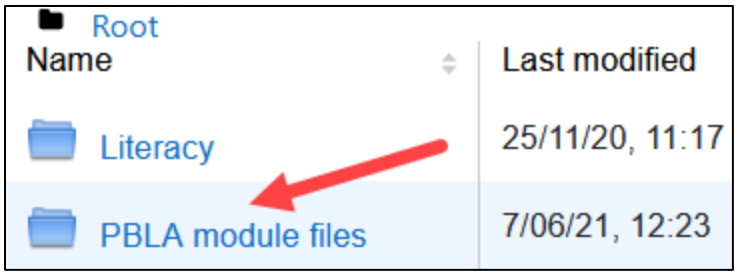
6. Click on **OK** in the **Confirm** pop-up.



7. Click on the **Add…** icon.

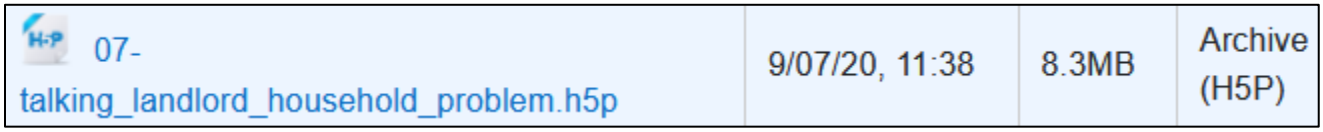
8. In the left column, select the **H5P Repository** option.

9. Click on the **PBLA module files** folder.



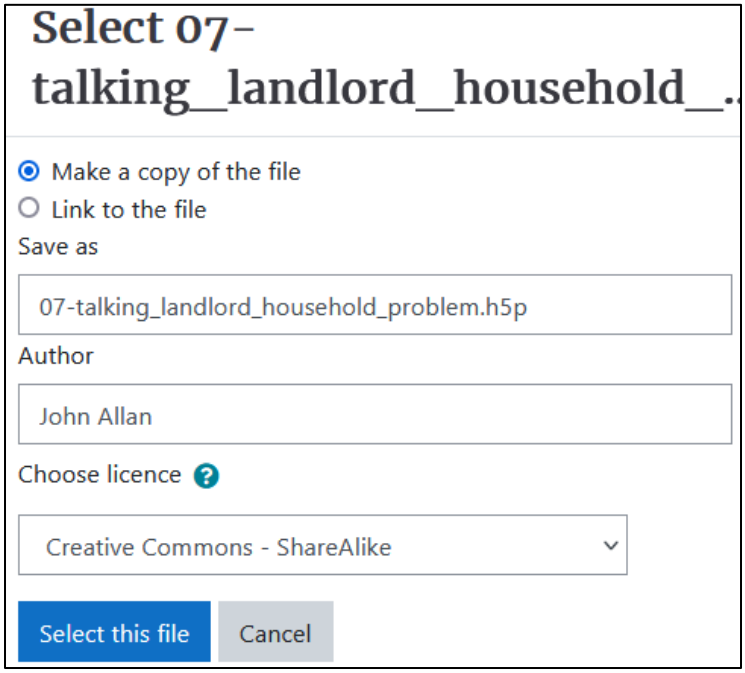
10. Locate and click on the appropriate **PBLA folder**.

11. Choose the appropriate **H5P** file.

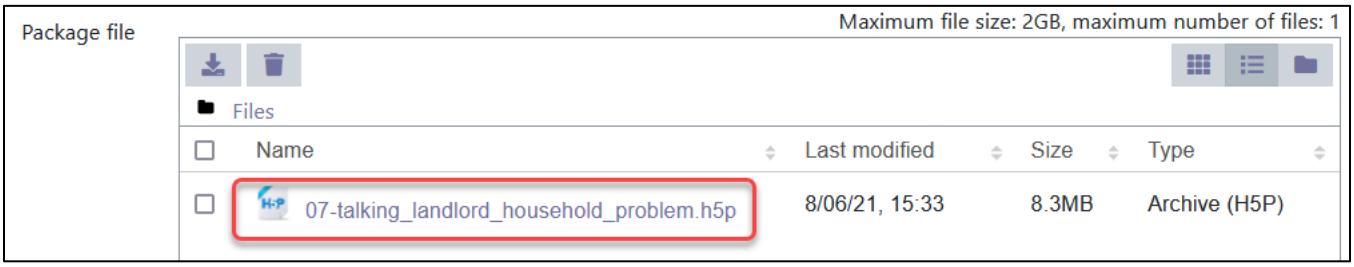


12. In the pop-up, ensure that:
    a. **Make a copy of the file** is selected
    b. The listed **Author** is your Avenue username
    c. The license is set to **Creative Commons – ShareAlike**.

13. Click on the **Select this file** button.



Note: The selected file appears in the **Package file** section.



14. Click on the **Save and Display** button.

Note: The appropriate **H5P** should appear and be ready for use with your students.
