

## How to Move an H5P Activity from One Course to Another

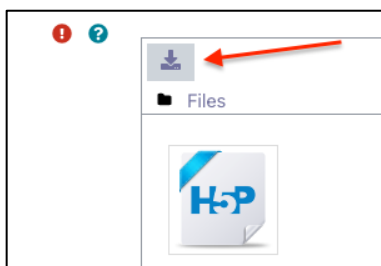

This method avoids bringing the entire **Content Bank** from one course to another.

### Downloading the .h5p File From the Source Course onto Your Computer

1. In the source course, turn editing on and use the **Edit** menu of the **H5P** to choose **Edit Settings**.

2. In the **Package File** section, click the **Download** button.

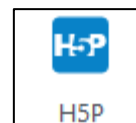

3. If the file is saved as a .zip file in your downloads, unzip it. Rename if necessary for easy retrieval.

### Adding the H5P to the Destination Course

1. Click the **Add an activity or resource** link in the appropriate topic.

2. In the **Add an Activity or resource** panel, click on the **H5P** icon. The **Adding a new H5P** window appears.

3. Click on the **Expand all** link to view all the sections.

4. In the **Name** text box, type in a brief title for the **H5P** learning object.

5. In the **Description** text box, type in a brief description of the **H5P** learning object.
6. If the description is to appear on the course main page, check the **Display description on course page** check box.

H5P

This H5P activity is the first learning activity of a unit that includes four sets of H5P eActivities focused on emergency situation vocabulary and understanding operator questions in a 911 call.

This Activity introduces medical emergency vocabulary.

☐ Display description on course page [?](#)

7. In the **Package file** section, the downloaded **H5P** file can be chosen by dragging the file from a folder on your computer onto the **Upload content** area, or by clicking on the **Choose a file...** button and uploading a file from your computer.

**Note:** the **H5P** file appears in the **Package file** list.

The remaining sections of the **H5P** setup can be copied from the source course.

8. The **H5P options** section provides options for the **H5P** user.

The **Allow download** option displays the **Reuse** link under the **H5P** activity. This allows others to download and reuse the **H5P** in their courses.

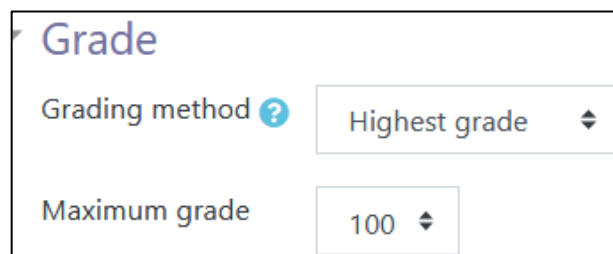

The **Embed** option allows others to link and display the **H5P** activity in their courses.

The **Copyright** link allows end users to acquire copyright information.

A screenshot of the 'H5P options' settings panel. It features a title 'H5P options' with a downward arrow. Below the title are three checkboxes: 'Allow download', 'Embed button', and 'Copyright button', all of which are currently unchecked.

9. The **Grade** setting determines how the score that is entered into the grade book is calculated.

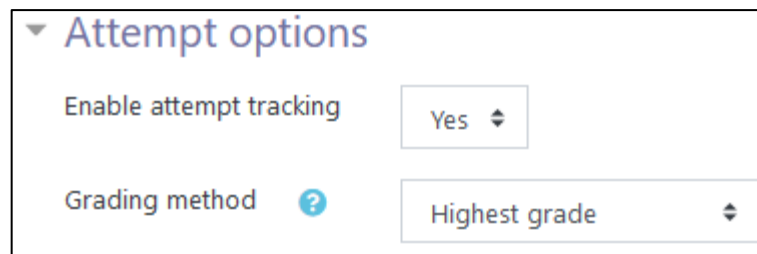

A screenshot of the 'Grade' settings panel. It has a title 'Grade' with a downward arrow. Below the title are two settings: 'Grading method' with a help icon and a dropdown menu showing 'Highest grade', and 'Maximum grade' with a dropdown menu showing '100'.

The **Grading method** setting determines the grade for a single attempt of the activity. The options are **Learning objects**, **Highest grade**, **Average grade** and **Sum grade**. The **Learning object** option uses the pass/fail setting in the **H5P** package. (The default is **Average grade**.)

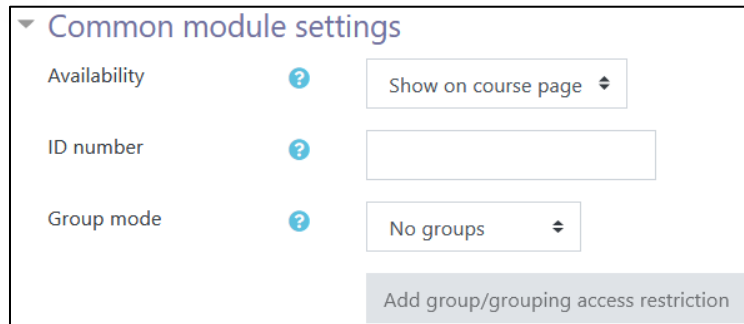

**Maximum grade** sets the highest mark that can be achieved for this activity. It is used in the grade book.

10. The **Attempt options** settings determine attempt tracking data for advanced reporting such as number of attempts, responses and grades. **Note:** Some **H5P** objects do not provide attempt tracking data. In such cases, the following settings will have no effect.

A screenshot of the 'Attempt options' settings panel. It has a title 'Attempt options' with a downward arrow. Below the title are two settings: 'Enable attempt tracking' with a dropdown menu showing 'Yes', and 'Grading method' with a help icon and a dropdown menu showing 'Highest grade'.

11. The **Common module** settings section is common to many Moodle activities and resources.
-

▼ Common module settings

Availability ? Show on course page ▾

ID number ?

Group mode ? No groups ▾

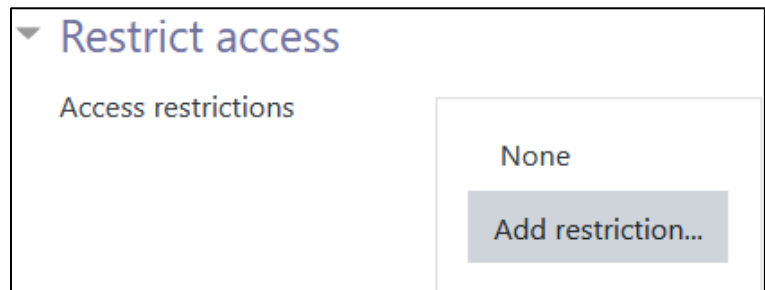

Add group/grouping access restriction

The **Availability** setting is used to **Show** or **Hide** the activity. This is identical to using the **Show/Hide** icons when the **Turn editing on** function is enabled on a course home page.

The **ID Number** setting sets an ID number for advanced use of the grade book. (This is not used in the LINC courseware.)

The **Group mode** settings are used to control the visibility options for different **Groups** if enabled. (More information is available in the **Organizing Learners Using Groups** documentation in the Stage 3 **Course Management** section.)

12. Settings in the **Restrict access** section can be used to limit access to the activity. (More information is available in the **Setting up and Using Restrict Access Settings** documentation in the Stage 3 **Course Management** section.)

▼ Restrict access
