# Activity Results Block

The **Activity results** block displays the results from activities in the course that are either graded or rated. Most activities display results. For example: forums, assignments, quizzes lessons and workshops.

Using this block is an easy way to add some gamification to your Moodle course. Both learners and instructors in a course can see the rankings of learners in an activity. If you like, you can add more than one **Activity Results** block to a course to track more than one activity.

Adding an Activity block to a course

1. On your course, click the **Turn editing on** button.

2. At the bottom of the Navigation drawer, click on the **Add a block** link.

3. From the pop up, click on the **Activity results** option.

   The new block appears.

Configuring the Activity results block

The default setting places the **Activity results** block on any type of course main page. To place this block on all course pages:

1. Click on the **Actions menu** icon in the new block.

2. Choose the **Configure Activity results block** option.
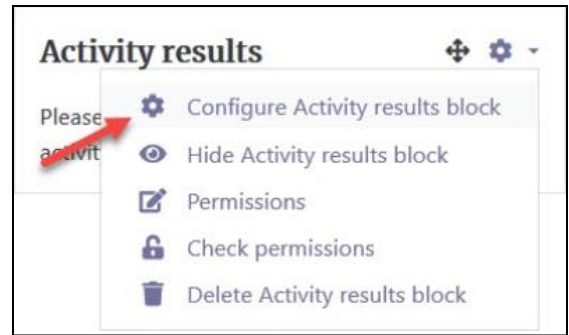

The **Configuring a Activity results block** page appears and the **Block settings** section is the first to display.

1. In the **Which activity should this block display results from?** item, click the drop-down arrow to choose the target activity from the choices available in your course.

2. In the **How many of the highest grades should be shown (0 to disable)?** item, choose whether you want the highest grades to show and if so, how many.

3. In the **How many of the lowest grades should be shown (0 to disable)?** item, choose whether you want to display the lowest grades and if so, how many. The default is "0", which we recommend.

4. The **Show groups instead of students (only if the activity supports groups)?** item can be set to yes or no, depending on whether the activity was built using Moodle's group function.

5. The **Privacy of results** item allows you to click the drop-down arrow to choose whether you want the results to reveal student's full names, ID numbers, or be shown as anonymous.

6. The **Display grades as** item allows you to choose whether you want the results to be displayed as percentages, fractions, or absolute numbers.

7. The **Decimal places to display** item allows you to choose the number, on a scale of 0-5, the number of decimal places to show in the posted result.

Using the Where this block appears Settings

Follow these steps to specify the pages **Where this block appears** in the course.

1. To specify the pages where the block should appear, use the **Display on page types** drop down menu. You can choose on **Any page**, on **Any course page** (including activities and resource pages) or on **Any type of course main page** (i.e. the course home page, or topic or section pages) from this menu.

2. Use the **Default Region** drop down menu to display the blocks on the left or right column.

3. Using the **Default Weight** setting, which ranges from -10 to 10, the location of a block can be specified in the side column. Select -10 to set the block at the top; select 10 to set it at the bottom. A zero is neutral.

4. Make sure to click the **Save changes** button once your choices have been made.

Using the Activities Results block

Once configured, the **Activity Results** block will display results for your chosen activity according to your chosen settings. You can subsequently hide this block from your students' view, delete it, or change the activity to a different one.

Activity results	
Home Sweet Home	
The 3 highest grades:	
1. Ahmed Ali	99.00%
2. Lee Chan	66.00%
3. Maria Guptez	33.00%

Video Resource

This video is a bit dated, but it gives you a general idea about the **Activity results** block.
