

This file explains how to use Tutela's advanced search function to locate a SCORM object.

Finding a SCORM Object using the Advanced Search

1. Click *Resources* in the main menu of Tutela.

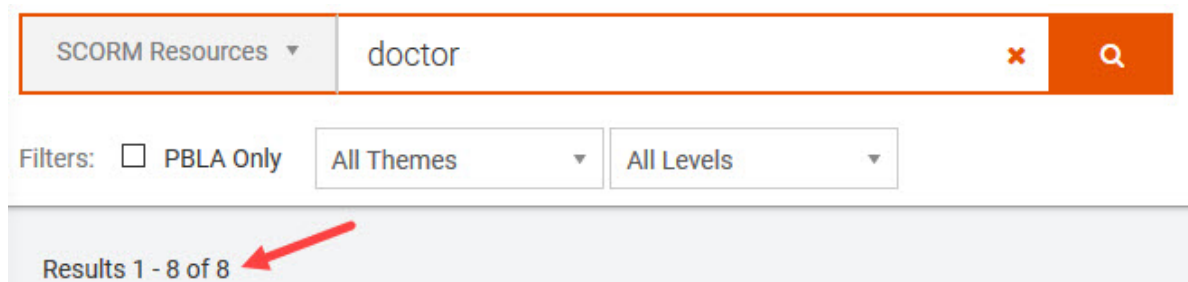

2. Select *SCORM Resources* from the drop-down menu beside the search bar.

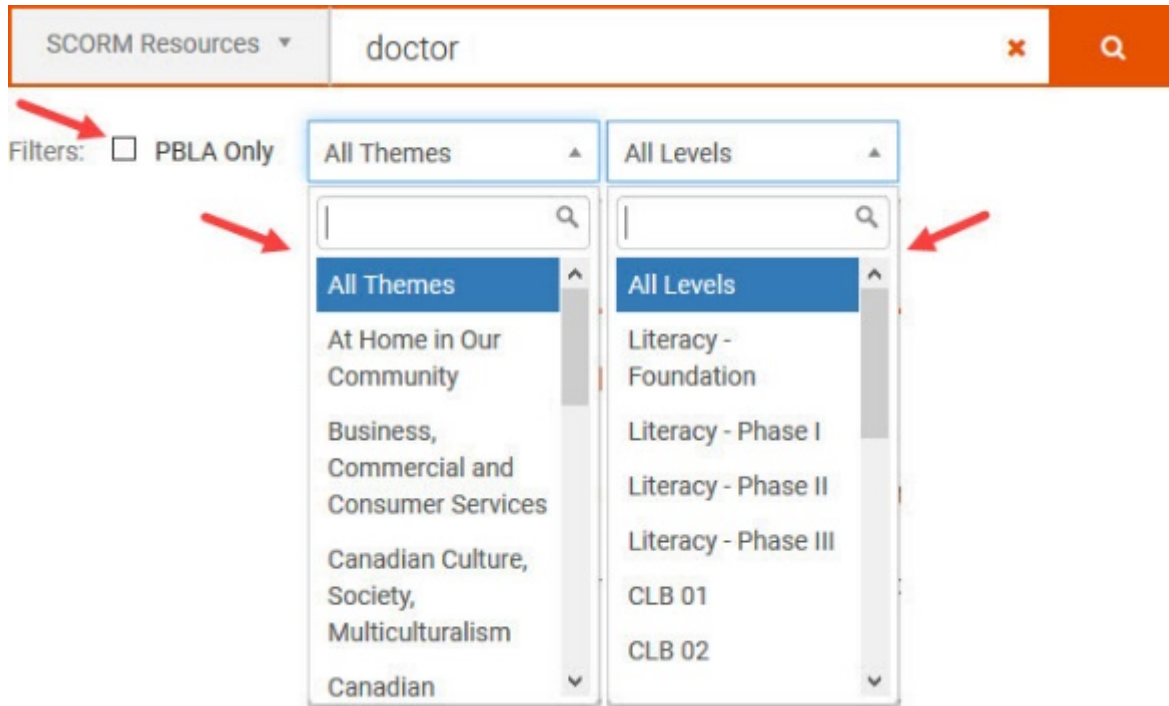

3. Enter keywords in the search bar. These keywords can be a subject of interest, a title of a resource or a type of resource, etc. Click on the search button to view the results.

4. The results page will open; browse the results.

5. Refine the search by selecting *PBLA Only*, a *Theme*, and/or a *Level*.

A page listing the SCORM items matching the search criteria appears.
