

Showing and Hiding a Course

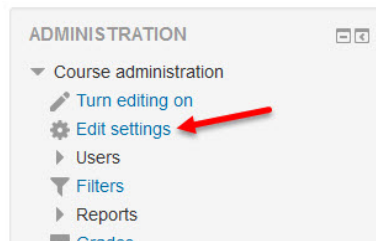

Courses can be hidden from students while they are being developed, updated, or during holidays. Your courses arrive in the hidden state. This allows new teachers to develop their courses in private. When the course is ready for a cohort of students, the teacher simply follows the instructions below to reveal the course to the students.

Showing your course to students

1. Navigate to your course
2. Click on the “Course administration” link in the Administration block

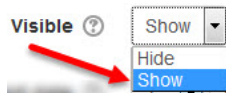

3. Click on the “Edit settings” link

4. In the “General” section, Click on the “Visible” drop-down menu

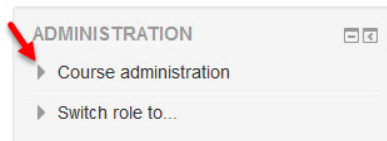

5. Choose “Show”

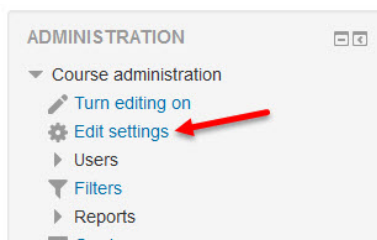

6. Click “Save changes”
 - Students now have access to the course
 - Be aware that sometimes this access is not immediate; it may take an hour before students can see the course.

Hiding your course from your students

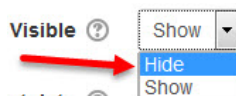

1. Navigate to your course
2. Click on the “Course administration” link in the Administration block

3. Click on the “Edit settings” link

4. In the “General” section, Click on the “Visible” drop-down menu Choose “Hide”

5. Click “Save changes”
 - Students cannot see the course
